EXPERIMENT – 5

FEATURE SCALING IN GIVEN DATASET

Aim:

      To provide feature scaling for a given dataset

Procedure:

•   Upload the given csv file

•   Import the necessities like numpy and Pandas

•   Use pandas to read_csv and make it as an data frame

•   Now use SimpleImputer to fill missing values

Program:

```python
from google.colab import files
uploaded=files.upload()
import numpy as np
import pandas as pd
file=next(iter(uploaded))
df=pd.read_csv(file)
df
```

Result:

Thus the python program to do feature scaling in given dataset is executed and verified successfu
